

Talun Eco-Products Inc.

www.talunecoproducts.com

Our seaweed extract is derived from *Laminaria* and *Sargassum*. It is produced according to the requirement stated in the Usage and Origin of par 4.2 of the Permitted Substances Lists of Canada Organic Standards.

We use a sophisticated Freeze Drying Process, as part of the extract production step, to ensure the integrity of the nutrients.

- Fresh seaweed
- Wash with water to desalinate the seaweed
- Remove shells and foreign debris
- Select good quality leaves
- Break up the leaves by progressive particle size reduction
- Fermentation Filter with plate-and-flame
- Cryoconcentration
- Dehydrolysis
- Cold drying
- Powdered
- Packing
